

THE FIRST & ONLY FLUORIDE VARNISH WITH RECALDENT™ (CPP-ACP)

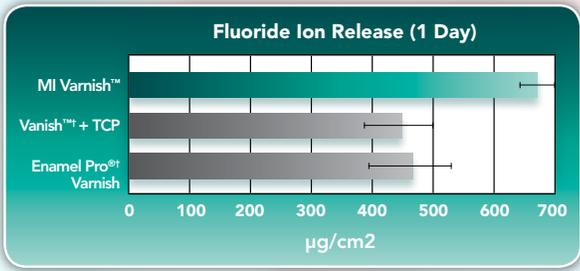

MI Varnish™

Topical Fluoride Varnish with Calcium and Phosphate

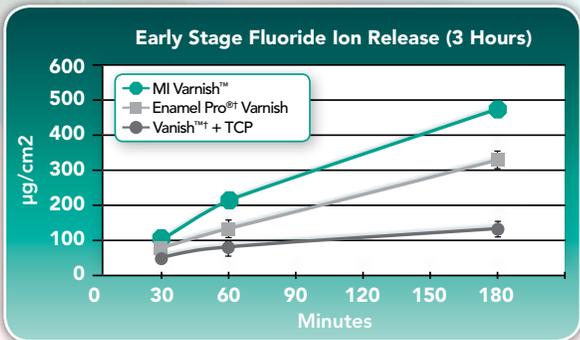

The Enhanced Varnish Treatment

- Combines RECALDENT™ (CPP-ACP) technology and sodium fluoride
- Bioavailable fluoride, calcium and phosphate ions released into the oral cavity¹
- Clear and smooth application
- Pleasing flavors - Fresh Strawberry and Fresh Mint
- Now with cost effective packaging (less waste)

Benefits of MI Varnish™

- Increased fluoride ion release²
- Does not separate or clump
- Not runny and flows easily
- Easy to open

Fluoride varnishes work by increasing the concentration of fluoride in the outer surface of teeth, enhancing fluoride uptake. Since fluoride varnishes are painted on teeth, they have extended contact compared to traditional fluoride rinses and pastes. This is a much longer exposure compared to other high-dose topical fluorides such as gels or foams, which is typically 10-15 minutes.

Your patients will love MI Varnish™. Its appealing white translucent shade does not immediately clump upon exposure to saliva allowing ease of use and longer working time. MI Varnish™ is clear when applied and flows easily into interproximal areas, due to its viscosity.

The MI Paste™ Family

MI Paste Plus™ is the essential solution to release calcium, phosphate, and fluoride. It is the first of its kind – containing naturally derived milk protein and fluoride for safe and effective treatment of sensitive teeth, white spot lesions, and remineralization. MI Paste™ offers the same great benefits but without fluoride.

MI Varnish™

Contains: 50 MI Varnish™ Unit-Doses (0.4mL / 0.44g each) and 50 disposable applicators.
442550 Fresh Strawberry 442555 Fresh Mint

MI Paste™

Contains: 10 tubes (40g each).
424505 Strawberry 423679 Mint
422265 Assorted (2 each: Vanilla, Strawberry, Mint, Melon and Tutti-Frutti)

MI Paste Plus™

Contains: 10 tubes (40g each).
428295 Mint

For at-home application!

RECALDENT™ (CPP-ACP) is derived from milk casein. Do not use on patients with a milk protein or hydroxybenzoates allergy. In case of allergic reaction, stop use, rinse mouth with water, and seek medical advice.
